

PROBIOTIC EVERYDAY »

A supplement providing FOS and live viable naturally occurring microorganisms

Probiotic Everyday for dogs is the right combination of prebiotics and probiotics to support digestive regularity, less gas and bloating while supporting superior immune health. This daily probiotic contains 1 billion CFU's of highly stable *Bacillus coagulans* and is delivered in a tasty duck flavored chew.

About Probiotics:

Probiotics are beneficial microorganisms that help control the critical balance in the digestive system. They prevent the growth of undesirable microorganisms. Balance within the digestive system is essential to maintain a healthy GI tract, protect against disease, improve digestion, and enhance overall health. Microflora also reside in other areas where mucous membranes are exposed to the environment, such as the skin, respiratory tract, and genital-urinary tract.

Benefits of probiotic treatment for dogs:

- » Supports digestion and prevents gas, bloating, and bad breath
- » Prevents unwanted strains of bacteria from growing to a population large enough to cause health challenges

- » Supports a healthy immune system
- » Produces B vitamins and enzymes
- » Supports regularity

About FOS (Fructooligosaccharides):

- » FOS are soluble fibers and prebiotics that support the growth of beneficial microbes in the intestinal tract. They have been shown to inhibit the growth of harmful bacterial species. Because FOS is not digested by the body, it will increase the amount of material in the intestinal tract and stimulate the elimination process to support regularity.

About GanedenBC^{30™}

- » GanedenBC^{30™} is now the first and only probiotic ingredient to be non-GMO verified by the Non-GMO Project. In addition, GanedenBC^{30™} is the first probiotic to show protein utilization benefits, and is FDA GRAS and USP Monograph listed.
